*** Estimates based on the 2021 Census of Population and Housing**

[b] Break in series

The population estimates published in these tables are based on the 2021 Census of Population and Housing. The revised estimate for 2021 supersedes the previous estimate published for this reference year. This updated estimate results from the ongoing intercensal revisions of the population time series. Further revisions to the population series from 2012 to 2021 will be disseminated later in the year.

Due to the revision of the 2021 population estimate and its use as a base for the 2022 estimate, there is now a temporary break in series. It is therefore currently not possible to compare the estimates in these tables with the current published time series up to 2020 until the revised series is finalised.
